OBJECTIVE

Detail-oriented Frontend Web Developer with 4 years of experience and a strong passion for responsive, user-centric design. I am seeking opportunities in a professional, dynamic, and challenging environment where I can continuously refine my technical skills and gain hands-on experience.

Short-Term Goal: Join a forward-thinking development team where I can contribute to real-world projects using modern technologies, while learning from experienced teammates. I am also open to opportunities that allow me to work in a backend role.

Long-Term Goal: Become a Project Manager, developing leadership and project management skills to oversee large projects and contribute to the team's success.

WORK EXPERIENCE

IPI TECHNOLOGY SOLUTIONS

Feb 2021 - Oct 2022

FRONTEND WEB DEVELOPER

- Projects: Loc Troi Group, Dam Ca Mau, KPS Mall, NPG, SSO, Anh Tin
Team size: 6 to 12 members, depending on the project
Technologies used: Javascript, ReactJS, Typescript, Redux, SCSS, Tailwind CSS, Bootstrap
Main responsibilities:
- Participated in the development and delivery of the Sales Management System (nRMS), Warehouse Management System (WMS), and Transportation Management System (TMS), integrating these systems with enterprise management solutions for businesses.
 - Developed and optimized responsive user interfaces using ReactJS, ensuring a smooth user experience across multiple devices.
 - Managed progress and task distribution for the CMS team.
 - Provided UI/UX feedback to designers and collaborated with PO and BA in business analysis. Review build content
 - Managed and deployed project versions across development, testing, and production environments.
 - Ensured code quality, fixed bugs, and improved project performance.
 - Identified the root cause of errors and provided solutions to resolve them, ensuring that fixed issues do not recur in the future.
 - Trained and mentored interns participating in the project.
 - Writing technical document

APPS CYCLONE TECHNOLOGY JSC

Nov 2022 - Apr 2024
